Masters Student at Université Hassiba Ben Bouali, Chlef  
Chlef, Algeria

## Summary

As a software engineer, I am a dedicated and ambitious student pursuing a Master's degree in Advanced Informatics with a specialization in Superior Engineering at UHBC. My passion lies in backend development, particularly with Node.js, where I have gained extensive knowledge and experience. Additionally, I possess a strong understanding of the MERN stack and databases, enabling me to create robust and efficient web applications.

While my primary focus is on backend development, I also have a solid foundation in AI using Python. Although my experience in this field is not as extensive, I am eager to expand my knowledge and skills in artificial intelligence.

Throughout my academic journey, I have developed a problem-solving mindset and a meticulous attention to detail. I thrive in collaborative environments, valuing effective communication and teamwork to achieve common goals. I am always eager to learn and stay up-to-date with the latest technologies and best practices in software engineering.

With a user-focused approach, I strive to create intuitive and user-friendly interfaces that enhance the overall user experience. I am committed to delivering high-quality software by thoroughly testing and debugging code to ensure its reliability and functionality.

Time management is a skill I have honed, allowing me to efficiently prioritize tasks and meet deadlines without compromising the quality of my work. I am accustomed to working under pressure and thrive in fast-paced environments.

In summary, I am a driven and adaptable software engineer with a strong foundation in backend development, a good understanding of the MERN stack and databases, and a growing interest in AI. I am

eager to contribute my skills and knowledge to impactful projects and continue my growth as a software engineer.
